Monthly Indicators

November 2023

Low inventory, elevated sales prices, and decades-high interest rates continue to weigh on the housing market, causing sales of existing homes to fall to their slowest pace since August 2010. According to the National Association of REALTORS® (NAR), U.S. existing-home sales declined 4.1% month-over-month and 14.6% year-over-year as of last measure, as prospective buyers, faced with rising homeownership costs, wait for mortgage rates, and home prices, to drop.

Closed Sales decreased 20.4 percent for Detached homes but increased 3.7 percent for Attached homes. Pending Sales decreased 11.1 percent for Detached homes and 11.0 percent for Attached homes.

The Median Sales Price was up 18.5 percent to \$1,107,650 for Detached homes and 18.6 percent to \$742,000 for Attached homes. Days on Market decreased 15.6 percent for Detached homes and 32.1 percent for Attached homes. Supply decreased 29.2 percent for Detached homes and 25.0 percent for Attached homes.

Inventory remains at historically low levels nationwide, with only 1.15 million homes for sale heading into November, a 5.7% decline compared to the same time last year, for a 3.6 months' supply at the current sales pace. The shortage of available properties for sale has kept pressure on home prices, which have continued to climb despite the slowdown in sales. According to NAR, the U.S. median existing-home sales price increased 3.4% from a year ago to \$391,800, an all-time high for the month, with annual price gains reported in all four regions of the country.

Housing Affordability Index

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
